

## Week 1

On a scale of 1 to 10, how much do you enjoy learning about science?

What is your favorite experiment you have ever done? (This could be a school project or something random you tried at home)

### Read Genesis 1:1-5

If you could have been there to watch God create one thing, what would you want to see most, and why?

Before today, what have you thought about how science and faith can go together?

How do you think science helps us understand and appreciate God's creation even more?

How often do you ask questions about things you don't know?

How might asking questions about science help you grow in your faith?

### Do This

Give everyone a note card and pen and ask them to anonymously write down any "what if" questions they have about science and faith. Remind them not to write their name on the card. Have them fold their note card and place it in a box.
